

Success with Diskeeper® 2008: Retail Stores

Caleb Coggins, BFS Retail & Commercial Operations, LLC

I would highly recommend Diskeeper to others - it allows me to automate routine tasks, lowers operating costs and allows me to focus on other IT issues.

Diskeeper on our server is great. We were first interested in Diskeeper, when I took over responsibility of several NT4 servers that had never been defragmented in years. After seeing the results of the trial version, we purchased a copy for the Windows® 2000 server that replaced the NT4 servers.

With "Set It and Forget It"® configured, I no longer need to manually defragment our file server. It takes care of itself.

I would highly recommend Diskeeper to others - it allows me to automate routine tasks, lowers operating costs and allows me to focus on other IT issues.

Chuck Murphy, Dream Gift Media

What can I say. Diskeeper really works, just as advertised - what a concept! We run 3 businesses which use the internet and computers extensively and cannot afford ANY slowdowns or problems.

We have 10 machines running 24/7 and since installing Diskeeper on each of them, we have had ZERO issues. We had been using the defrag programs that came with Windows prior to this - all I can say is Diskeeper is such an improvement! It runs in the background perfectly and does just what it says it will do.

Diskeeper is a product that really works. We love it!
