

Background

Owasso Public Schools is located in Owasso, Oklahoma. Owasso has 700 hundred employees along with 1500 PCs.

The Challenge

We have 13 different sites, over 1500 PC's and very few people supporting all the technology needs of the school district. We decided to find and use tools that will help our technology dept. to do more automation of what we do. We particularly looked for a tool to manage remote control, remote inventory and software distribution.

Situation

We evaluated Altiris, Desktop Authority, LanDesk and NetSupport DNA. We found that NetSupport DNA is the most user friendly among all the products tested and it satisfied all of our requirements. We started with 50 licenses distributed all over the district's 13 sites, mostly in the offices. We're planning to extend it to every critical user in the district.

NetSupport Solution

We're very happy with the remote control and inventory capabilities. Our troubleshooting is now done more efficiently and in a timely manner.
